

RKW Group

Internship in Sweden

The RKW Group is offering an **Internship** in our **Site in Sweden** (location: Helsingborg, South of Sweden, product capacity: 25.000 tons/year, number of employees: 70).

We offer a good internship salary and a great working possibility with the Application Engineering and R&D Department team and the production teams. Concerning accommodation, we have a company apartment you can rent for a very beneficial rent if you like.

We are looking now for an Intern who wants to stay with us from spring 2026 to autumn 2026.

Possibilities:

- Be in charge of interesting projects and prepare and develop new applications for our materials
- Support the department of Research & Development (inspection technologies, quality control)
- Learn about the advantages of mineral-filled plastics and discover the steps to create a custom-tailored product
- Be part of the production and gain insight into the whole processing from the raw material to the ready-made compound and additionally the further processing to a blown film
- Gain an understanding of the entire business structure, even beyond plastics processing
- Improve your English skills
- Discover a new country (also the Danish capital Copenhagen is not far away), language and people

What should you bring along?

- Current studies with specialization in plastic processing, chemical engineering or similar programs of study
- Practical experience (student assistant, apprenticeship, etc.)
- Ability to work independently
- Willingness to become part of a team
- Languages required: Good English skills (corporate language)
